

AccuCopy[®]

A New Light for Multiplex Detection of CNV!

Technology for Fast and Accurate Multiplex Copy Number Variation Analysis

About AccuCopy[®] Technology

- ★ Based on multiplex fluorescence competitive PCR
- ★ **Highly Accurate:** at least three reference genes used; measurement CV of <10% on average
- ★ **Fast Measurement:** needs less than five hours to finish an assay
- ★ To identify copy number of more than 12 gene loci each assay.
- ★ Quite applicable in validation of target CNV regions
- ★ **Clinical Applications:** fast detection of segmental deletion/duplication
